linnea,

A few days ago, you requested our [Mobile App Security Study](#). Please let me know if you have any questions or would like to discuss.

At NowSecure we spend a lot of time attacking mobile apps. Hacking. Breaking encryption, finding flaws, pen testing and looking for sensitive data stored insecurely. We do it for the right reasons - to help companies make their apps more secure. To learn about all the vectors that attackers might use on your app, read our [Mobile Security primer](#).

If you're interested in finding out how NowSecure can help you secure your mobile apps and devices, reply to this email.

Sincerely,

Andrew Hoog
CEO and co-founder
NowSecure
